dl: Download Ticket Service

"dl" is a simple file sharing service for quick/one-off file transfers.

- Upload a file to get a link you can share or
- create a sharing link to receive files from others.
- The uploaded files are automatically removed when left unused, requiring zero additional maintenance.

"dl" is built for your users:

- easy to use with any browser,
- integrates smoothly with Thunderbird for large attachments,
- works on Android, Windows, OSX or
- straight from the command line for maximum convenience.

Login with your unibz credentials and start using it:
