New academic staff (visitors and permanent staff)

Should you be a new collaborator of the faculty of computer science or should you be a visiting academic you should already have received a username and password @UNIBZ. This allows you to login here and read first-technical-details for using UNIBZ technological services.

If your collaboration starts soon and you still did not receive a username and password and/or the campus card, please contact our secretariat at the first floor of POS Building. They will help you with both.
