Streaming Server

The Faculty has a streaming server that can be used to broadcast live events to 3rd parties. Compatible clients are Quicktime, available under Windows and MacOS) and VLC (videolan client, available under Linux, *nix, Windows and MacOS). Depending on the quality of the stream we are able to serve between 8 an 20 different clients.

To prepare and setup a streamnig session, please contact the Faculty System Administrators *mailto:cs-helpdesk@inf.unibz.it at least 3 days in advance. If in possession of the credentials for a live stream, you can setup_a_broadcasting_session by yourself
